1 In popular language, any insect of the genus *Vespa*, chiefly applied to *V. vulgaris*, the Common Wasp, and such other species as are not readily distinguishable from this, sometimes taken to include the Hornet, *V crabro*, which resembles the Common Wasp, but is larger and has a more powerful sting. The obvious characteristics of the genus are the alternate rings of black and yellow on the abdomen, the narrow stalk or petiole by which the abdomen is attached to the thorax, the fully developed wings, and the formidable sting (which, however, is peculiar to the females and the workers or imperfect females) In scientific language applied generally to two divisions of hymenopterous insects, the Diploptera or true wasps, and the Fossores or digger wasps.

The true wasps (*Diploptera*) are divided into three families, (1) *Vespidæ*, to which the common wasp belongs; (2) *Eumenidæ*, and (3) *Masaridæ*.

Wassail (wɒ s'l, wæ's'l, -eil), *sb.* Now only *arch.* and *Hist.* Forms: 3 wæs hæil, wæshail, washayl, washail, wesseyl, 3–4, 7 wassayl, 3, 6–7, 9 *arch.* wassaile, 5 wassaylle, wessayle, (whatsaile, -saill), 6 wassaill, -ayle, 6–7 wassall, 7–8 wassal, (7 vassaile, *Hist.* was-haile, washeall, waes heal, 9 waisall, waissel, *arch.* was-hael), 5–9 wassel(l, 3– wassail [ME *wæs hæil* etc., a. ON. *ves* (= later *ver*) *heill*, corresp. to OE. *wes hál* lit. 'be in good health' or 'be fortunate'. see BE *v.* A. 3 and WHOLE *a.*

As an ordinary salutation (= 'hail' or 'farewell') the phrase, or an approximation to it, occurs both in OE (*hál wes þú*, and in pl. *wesað hále*· see BE *v.* A. 3) and in ON (pl *verið heilir*) But neither in OE nor in ON, nor indeed in any Teut lang, has any trace been found of the use as drinking formulas, of the phrases represented by *wassail* and *drinkhail* It seems probable that this use arose among the Danish-speaking inhabitants of England, and became more or less common among the native population; in the 12th c. it was regarded by the Normans as markedly characteristic of Englishmen. The earliest known occurrence of the phrases is in Geoffrey of Monmouth VI XII, (*c* 1140), in the well-known story of Rowena (*wes heal drinc heil.* V I *was heil*, printed edd corruptly *wachi heil*) Geoffrey's attribution of the phrases to the 5th century is an anachronism, the original story as told by Nennius contains nothing corresponding to them In Wace's *Brut* (*c* 1180), which is a metrical version of Geoffrey, various MSS have *weshel, waissel, gasel, drinkel, drunchehel, drechehel* That Wace's acquaintance with the 'English' phrases was not wholly derived from the passage in Geoffrey is shown by his reference to them in the *Roman de Rou*, where it is said that the night before the battle of Hastings was spent by the English in revelry, with cries of *weissel* (V IT *wesse heil, wolsel, wesel*) and *drunchehel* (V IT *drincesel, drinqueheil, drinkeil*) In the *Speculum Stultorum* of Nigellus Wireker (*c* 1190) the English students at the university of Paris are praised for generosity and other virtues, but are said to be too much addicted to *wessail* and *dringail* The earliest example of the phrases in an English context is in Layamon's translation of Wace

In *drinkhail* the second element is, as in *wassail*, the ON. adj *heill* used as complement Although the phrase *drekk heill* is not recorded in ON, it has an exact syntactical parallel in *sit heill*, 'sit in health'. Whether the form of the first element in *drinkhail* is due to OE influence or is archaic Scandinavian is doubtful; the form *drechehel* in one MS of Wace is noteworthy from its resemblance to the ON. of the literary period]

Watchet (wɒ·tʃĕt), *sb.* and *a. Obs.* or *arch.* Forms: [? 2 waschet] 4 waget(t, vachet, 4–7 wachet(t, 5 waycett, 6 wattchett, watchit, -eth, watchshide, wattshode, wetshode, 6–7 watched, watchott, 7 watcht, wetchod, -et, 6– watchet. [App. a. OF. It is possible that *waschet*, *wachet* may be a dim. of the word which is found once (spelt *wasce*) in a Douay document of 1262; Godefr. explains this as 'sorte d'étoffe', but the interpretation is not certain from the context. The Central OF. *gasche*, recorded once (1448), for some kind of appendage or ornament of a shoe, would correspond formally, but if Godefr. is right in rendering it 'buckle' the connexion is out of the question.

It is tempting to compare mod. Walloon *waies* royal blue (which Diez would connect with OF. *guesde* WOAD); a dim. formation on a word of this meaning might have been used to denote a lighter shade of the colour. But the phonological possibility of such a derivation of *wachet* is very doubtful.]

¶ **2.** In Ps. xlii. 7 (Bible version) the word is now commonly apprehended as an example of sense 3 below. It was, however, probably intended as a metaphorical use of sense 1; and it seems likely that the meteorological sense 3 arose from recollection of the passage of the psalm.

The Heb. word *ṣinnōr*, here rendered by waterspout', occurs elsewhere only in 2 Sam v 8, where it has been interpreted 'spout or gutter on a roof' so Vulg. *domatum fistulas* (Wyclif 1382 'the goters of the hows euen,' Douay 'the gutters of the house toppes') the Bible of 1611 has 'the gutter', and the Revised Version 1881 'the water-course'. In the psalm, the word is rendered in the LXX by καταῤῥάκτης and in the Vulg by *cataractæ* (Wycl 'gooteris', Douay 'sloud gates'), the mod translators from the Heb essayed to find a literal rendering in accordance with the apparent sense of the word in 2 Sam v. 8, hence Pagninus has *fistularum* (whence Coverdale by misapprehension renders 'whistles'), the Great Bible (1539) has 'water-pipes'

1611 BIBLE *Ps* xlii 7 Deepe calleth vnto deepe at the noyse of thy water spouts.

Watling-street (wǫ·tlɪnstrīt). Forms: 1 **Wæclinga-, Wæxling(g)a-, Wætlinga-, Weatlinga-strǽt,** 2 **Watlingestrate,** 3 **Watelinge stret,** 4 **Wat(e)lynge-,** 5 **Watlyn-,** 5 **Wadlyng-, Watelynge-,** 6 *Sc.* **Vadland-,** 6 **Watlyng-,** 6– **Watling-.** [OE. *Wæclinga strǽt*; the first word, app the genit. pl. of the name of a (real or imaginary) family or clan, occurs also in *Wæclinga ceaster* ('the Wæclings' city'), the OE name of the Roman-British Verulamium (now St. Albans), through which the 'Watling-street' passes.

The forms with *tl* for *cl*, which have been universal from the 12th c, are all but non-existent in MSS of pre-Conquest date; a solitary example is *Wætlinga ceaster* in *OE Martyrology, St Alban*, 22 June (MS Cott. Julius A x. fol 112, written *c* 975) The change of *Wæclinga* into *Wætlinga* can hardly be due to the close resemblance of *c* and *t* in OE script (though many instances of the latter form in modern editions of OE texts are mere editorial misreadings), because the existence of sense 2 seems to show that the name of the Roman road was preserved in popular and not merely literary tradition. Perhaps the word may have been assimilated to the *Wætlinga* which occurs in the place-name Watlington (Oxon and Norf).

The Wæclings may have been either an actual family that had obtained possession of the site of Verulamium, or a dynastic family celebrated in Mercian tradition, to whom, as typifying remote antiquity, the road and the city were attributed by popular fancy It has been suggested that *Wæclinga ceaster* is a corruption of *Werlama ceaster*, an alternative OE name of Verulamium (*Uæclingacestir sive Verlamacester*, Bæda *H E.* I vii), which is an adoption of the British name in a later form; but the conjecture is untenable]

1 The English name given in pre-Conquest times to the Roman road running from near London through St. Albans to Wroxeter; by antiquarian writers from the 12th c. onwards extended to Roman roads leading from London to the S.E. and from Wroxeter to the north or west.

The places mentioned in OE. charters as situated on or near the 'Wæclinga-strǽt' are Hampstead; Chalgrave (Beds); Stowe (Bucks); Weedon (Northants); Aston (close to Wroxeter): see Birch *Cart Sax* Nos 1309, 659, 986, 792, 1315. According to Henry of Huntingdon (*died* 1154) the Watling-street extended from Canterbury to Chester; according to Robert of Gloucester (*c* 1290) from Dover to Chester; according to Higden (*c* 1340) from Dover to Wroxeter and thence to Cardigan Modern writers usually assign Dover or Richborough and Chester as the terminal points; but some apply the name Watling-street to the road running northwards from Wroxeter through Lancashire

Watt (wǫt). *Physics* [f name of James *Watt* (1736–1819), the inventor of the modern steam-engine, and a pioneer in the science of energy.] A unit of activity or power (used chiefly with reference to electricity), corresponding to 10^7 ergs of work per second, to the rate of work represented by a current of one ampere under the pressure of one volt, or to $\frac{1}{746}$ (= 00134) English horse-power.

The bark of most of these trees is valuable for use in tanning, and they exude a gum resembling gum arabic. The golden yellow flowers are celebrated for their beauty and fragrance.

Wattle (wǫ t'l), *sb.*[2] Also 6 wattell(e, 7 waddle, wadle. [Of obscure origin; possibly an altered form of Wattle (which, however, does not appear so early in our quots.), due to assimilation to prec.

Usually believed to be identical with Wattle *sb.*[1] On the ground of the reading '*a watel* ful of nobles' in two closely related MSS. of *Piers Plowman* C (where other MSS have *wadel*) it has been assumed that from the primary sense of 'something intertwined' (see prec.) was developed the sense 'basket', and hence that of 'wallet', which would be a possible source of the senses below. (Cf. Shaks 'wallets of flesh': see Wallet *sb.*[2]) This explanation is connected with the view that *wallet* is a metathesis of *watel*; but in all probability the reading *watel* in *Piers Plowman* is merely a scribal error for *walet*.]

5. Modern scientific uses.

a. *Physics.* Each of those rhythmic alternations of disturbance and recovery of configuration in successively contiguous portions of a fluid or solid mass, by which a state of motion travels in some direction without corresponding progressive movement of the particles successively affected. Examples are the waves in the surface of water (sense 1), the waves of the air which convey sound, and the (hypothetical) waves of the ether which are concerned in the transmission of light, heat, and electricity.

Hertzian waves : a class of ether-waves (discovered by the German physicist Heinrich Hertz in 1888) similar to light waves but of much greater wave-length.

Outside Teut the word occurs as Lith *vãškas*, OSl *voskŭ* (Russ ВОСКЪ, Pol *wosk*, Czech *vosk*), but prob adopted from Teut The root may be identical with Teut **waxs-* to grow (Wax *v*[1]); it seems not impossible that the etymological sense may have been 'that which grows (in the honeycomb)' The view now most in favour refers the word to the Indogermanic root **weg-* to weave, found in OIrish *fegim* I weave, L. *vēlum* veil, sail (believed to be from prehistoric **veg-slom*), and in certain Teut words (see Wick *sb*[1]); the advocates of this etymology appeal to the apparent semasiological parallel of G. *wabe*, honeycomb, presumed to be from the root of *weben* Weave *v*[1] Some other hypotheses have been proposed, but they are all unsatisfactory with regard either to form or meaning.]

1 A substance (also distinctively called Beeswax) produced by bees, and used by them as the material of the honeycomb It is a secretion of special glands in the abdomen, mixed with the secretion of the salivary glands in the process of mastication; when slightly warmed it is readily moulded into any shape, and when heated to about 150° melts into a liquid, in its natural state it is of a bright yellow colour. *Butter of wax*. see Butter *sb*[1] 3. The OTeut conjugation of the verb is retained in Goth., OHG, OS, and ON., in OE. it is confined to the Northumbrian dialect (pa. t. *wéa*), the WS. pa. t. *wéox* and the Du *wies* are due to the analogy of the reduplicating verbs.

The strong pa. t. became rare after the 14th c, and is now wholly obsolete; the one or two examples in the poetry of the 18–19th c. are deliberately archaistic. For the pa. pple. the Bible of 1611 has *waxed* four times and *waxen* eight times; in recent use *waxen* is not unfrequent when the verb is conjugated with *to be*, but is otherwise very rare]

Originally a more frequent synonym of Grow *v.*, which has now superseded it in general colloquial use, exc. with reference to the moon (see 6). With this exception, the senses below which are not marked as obsolete are confined to literary use, and have, in varying degrees, a somewhat archaic flavour; some of those under branch I survive only in the traditional antithesis with Wane *v.* The verb is said still to be current in certain dialects: see *Eng. Dial Dict.*

† **Wa·xen,** *v*.[1] *Obs.* Also **wexen, weaxen** In several writers of the 16th c (chiefly poetical) the forms *waxen, wexen* occur for Wax *v*.[1], but only in those parts of the verb (inf and 3rd pers pl present) in which these were in ME the normal inflected forms of *wax*. This may sometimes be due to intentional grammatical archaism, but when these forms are used by writers whose grammar is in all other respects normal, it seems probable that the inflexional *waxen* in quotations from older writers was mistaken for a verb synonymous but not identical with *wax*. It has been thought desirable to give here all the examples in our material, in order that their individual significance may be judged of by comparison The 17th c. quots from H More, which are added for completeness, are of course intentionally archaistic

b. Qualified by poss. pron., the word often occurs as object or as adverbial accusative to the verb *go* (see Go *v.* 21 b) and its synonyms, †*fare*, †*fere* (see Fare *v.*1, Fere *v.*), *wend*, etc. From an early period *my*, *his* (etc.) *way* in these collocations were often nearly equivalent to 'away', and with this weakened sense they were formerly used with other verbs of motion, as *flee* (see Flee *v.* 1 d), *run* (see Run *v.* 34), *come*, *pass*, *ride*. In present literary use *to go*, *wend one's way* survive as archaisms; mod. dialects have only the imperatives *go*, *come your* (*thy*) *way* (or *ways*: see 23 b).

c. In the Bible phrase *to go the way of all the earth* (Josh. xxiii. 14, 1 Kings II 2) meaning 'to die'. Also in erroneous forms (due to confusion with other Bible passages), *the way of all flesh*, *of all living*. (*The way of all flesh* has sometimes been used to mean the experience common to all men in their passage through life.)

A passage (dated 900) in Birch's *Cartul. Sax.* II. 241 'Quando Ælfred rex..viam universe carnis adiit', shows that the substitution of 'of all flesh' (*universæ carnis*) for 'of all the earth' (*universæ terræ*) was current in med. Latin. The reading of the Douay Bible (quot. 1609) suggests that the substitution must have found its way into some printed copies of the Vulgate; also, the Plantin Concordance (1642) reads *carnis* s. vv. *Caro* and *Ingredior*, though elsewhere the two passages are cited with the reading *terræ*.

Way, obs. form of WEIGH *v.*, WEIR, WHEY, WOE.

-way (wē), as a terminal element of advs., is identical with WAY *sb.*[1]

1. Phrases consisting of the sb. qualified by an adj. are often used adverbially (see WAY *sb.*[1] 8, 14 d, etc.), and some of the combinations of adj and sb. thus used have come to be apprehended as single words, and so pronounced and written; the second element, losing its separate stress, has assumed in some degree the aspect of an adverbial suffix. The only early example of this process is the OE. *ealne weg*, an adverbial accusative, which after the disappearance (in the 14th c.) of adjectival flexion became ALWAY (q.v. for the development of meaning). *Anyway, everyway, norway, someway*, written as single words, are not found before the 16th c. The only advs. in *-way* f. descriptive adjs are *broadway* (16th c.), *crossway* (early 17th c.), *straightway* (as two words in 15th c.; as one word from 1530). Most of the above-mentioned advs. have parallel and synonymous forms in -WAYS.

2. The few advs. f. sb. + *-way* do not originate from phrases, but are genuine compounds; they all have parallel forms in -WAYS. †*Needway* 'necessarily' occurs in Barbour *c* 1375 (*needways* in *Cursor M. a* 1300). *Edgeway, endway, sideway, sunway*, which denote direction of movement, are, like the corresponding forms in -WAYS, not older than the 16th century.

3. *Crossway* and *sideway* are frequently used as adjs.; the other advs. in *-way* expressing spatial direction would perhaps admit of a similar use, but it is not evidenced in our quotations.

-ways, the terminal element of certain advs., was originally a use of the genitive of Way *sb.*[1]

1. Many phrases consisting of the genitive of *way* (in various senses) qualified by an adj., were formerly used adverbially (see Way *sb.*[1] 23 a). The earliest known examples are in the Peterborough Chronicle (first hand, A D. 1124) which twice has *dōres weges* in the sense 'by another route'; in this phrase the adj appears uninflected before the end of the 12th c. (see Otherwais). Similarly *alles weis, nanes* (*nones*) *weis* occur early in the 13th c, becoming *always, noways* in the 14th c. On the analogy of these words were subsequently formed †*everyways* (1398), *anyways*, †*likeways* (16th c.), and (from descriptive adjs.) *crossways, longways, straightways* (16th c.), *broadways* (18th c.).

2. A solitary instance of an adv. f. sb + *-ways* before the 16th c. is † *needways* 'necessarily', occurring in the *Cursor M.* (*a* 1300) and in Barbour. In the later formations the general sense is 'in a specified direction'; so *endways, lengthways, sideways* (16th c.), *edgeways, breadthways* (17th c.), *sternways* (19th c.), *sunways*.

3. As there is no perceptible difference of function between the adverbial genitive and the adverbial accusative, most of the advs. in *-ways* have synonyms in *-way*. Further, most of the advs. in

-ways are synonymous with actual or possible parallel formations in -WISE, and the similarity of sound of the two suffixes has given rise to the notion that they are mere alternative forms of one and the same ending Johnson's erroneous statement (s. v. *Way*) that '*way* and *ways* are often used corruptly for *-wise*' has probably led many to prefer *-wise* to *-ways* or *-way* on the ground of supposed correctness. Wayzgoose (wē·zgūs). [Alteration of Waygoose, under which the earlier evidence for the word is given.

The eccentrically spelt form *wayzgoose*, which, although established in recent use, has not been found, exc. in Bailey's Dictionary, earlier than 1875, is prob. a figment invented in the interest of an etymological conjecture (see quot. 1731). Bailey's assertion that the word had the sense of 'stubble-goose' is unsupported, and is very unlikely; this allegation, and the accompanying fantastic misspelling of Wase, may have been suggested by the idea that the obscure word *waygoose* could be explained on the assumption that it had lost a *z*.

The *Eng. Dial. Dict.* refers to Cope's *Hampshire Glossary* for '*waze-goose*, a stubble-goose', but Cope's authority for this is a MS. word-list which, he says, 'contained many words that had certainly no relation to the dialect of the county'.) It seems clear that the genuine traditional form among printers was *waygoose*, and that the form *wayzgoose*, now prevailing, is a supposed correction following the authority of Bailey. The statement that goose was 'the principal dish' (or even that it was eaten at all) at the 'waygoose' dinner is destitute of evidence. It is possible that *waygoose* may be a corruption by popular etymology of some earlier word, but no satisfactory explanation has been found either in English or in any foreign language.]

Originally, an entertainment given by a master-printer to his workmen 'about Bartholomew-tide' (24 August), marking the beginning of the season of working by candle-light. In later use, an annual festivity held in summer by the employees of a printing establishment, consisting of a dinner and (usually) an excursion into the country.

1731 Bailey (ed. 5), *Ways*, a Bundle of Straw. *Wayz-goose*, a Stubble-Goose, an Entertainment given to Journeymen at the beginning of Winter. [1833 Tempest-ley *Songs of the Press* 23 *note*, Way Goose.—The derivation of this term is not generally known. It is from the old English word *way*, stubble. A wayz Goose was the head dish at the annual feast of the forefathers of our fraternity, '*Wayz Goose*, a stubble Goose, an entertainment given to journeymen at the beginning of Winter.'—Bailey.]

1875 Southward *Dict. Typogr.* 137 The wayzgoose generally consists of a trip into the country, open air amusements, a good dinner, and speeches and toasts afterwards. 1895 *Surrey Mirror* 23 Aug. 2/7 The members of the typographical staffs of the *Surrey Advertiser* (Guildford) and the *Surrey Mirror* (Redhill) had their wayzgoose on Saturday last, when they journeyed to Brighton.

ON. *veik-r*, corresponding to OE. *wāc*: see WOKE *a.*

The earliest known examples are in the *Cursor Mundi* (*a* 1300, but MSS. 14th c.); the word gradually took the place of the corresponding native adj (OE *wāc*, ME. WOKE) which did not survive beyond the 15th c. There seems to have been some difference of meaning between OE. *wāc* and ON *veikr*; in OE. the primary Teut sense 'yielding, not rigid or firm, pliant' was still prominent, while in ON. it had developed into the sense 'not strong'

The *β*-forms show the same development of Scand *ei* to *ē* which is found in BLEAK *a* (earlier *bleyke*, ON *bleik-r*), STEAK *sb.* (ME. *steke, steyke*, ON *steik*); still pron dialectally with *ē*), and RFAN, var. of RAIN *sb*.[2] (ON *regn*)

In mod dialect literature the word is often written *wauk* or *wake* Graphically, these forms belong to the *a* group; but in certain areas it may be doubtful whether the shade of pronunciation denoted by the spelling descends from ME. *ē* or from ME *ei* As the normal Sc representative of OE. *wāc* is *wake*, which in late Scottish might have been written *waek*, it is possible that some of the Sc examples given below belong etymologically to WOKE *a.* rather than to the present word]

b. In the translations of the Bible from Tindale onward, used to render Gr. ἀσθενής, ἀσθενῶν, applied by St. Paul (esp. in Rom. XIV and I Cor. VIII) to believers whose scruples, though unsound, should be treated with tenderness, lest they should be led by the example of the more enlightened into acts condemned by their conscience. Hence allusively in *weaker brethren* (often supposed to be a scriptural phrase), applied to the more timorous members of a party, who are in danger of being shocked by extreme statements of principle or policy.

In the Wycliffite and other early versions the rendering is 'sick' (Vulg *infirmus*).

[OE. *wela* (*weola, wealæ*) wk. masc. = OS. *welo*, OHG. *wolo*:—OTeut. **welon-*, f. root **wel-*: see WELL *adv.*

The 14th cent. northern form *wel* (*well*) is merely a variant spelling, and the length of the vowel is proved by rhymes; but from the 15th cent. in midland and southern texts a real confusion between *wele* and *wel* appears, owing to the currency of double forms of the adverb 'well'. In consequence of this the noun is sometimes written *wel, well*, or *welle*, and in this form is latterly identified in pronunciation with the adv. (For examples see WELL *sb.*3) On the other hand the adv. in the form *wele* or *weele* has influenced the meaning of the noun in sense 4 below, and probably contributed to its use in sense 3 (and in WEAL-PUBLIC) as an equivalent of L. *bonum* and F. *bien*.]

4 *Economics* A collective term for those things the abundant possession of which (by a person or a community) constitutes riches, or 'wealth' in the popular sense.

There has been much controversy among economists as to the precise extent of meaning in which the term should be used. The definition that has been most widely accepted is that of Mill (quot 1848 below)

1821 Torrens *Ess. Produit Wealth* i 3 When we say, a man of wealth, the term implies quantity, and signifies an abundance of the comforts and luxuries of life But when we say, agriculture is a source of wealth, the accessory idea of quantity is not implied, and the term comprises the products of agriculture, whether they be raised from one acre or from a million, whether they are capable of subsisting an individual, or a nation 1825 Bentham *Ration Reward* 237 All wealth is either the spontaneous production of the earth, or the result of labour, employed in the cultivation of the earth or upon the materials which it yields 1832 Ht Martineau *Life in Wilds* II 23 Whatever lives, or grows, or can be produced, that is necessary or useful, or agreeable to mankind, is wealth 1848 Mill *Pol Econ* I Prel Rem. 8 Money, being the instrument of an important public and private purpose, is rightly regarded as wealth; but everything else which serves any human purpose, and which nature does not afford gratuitously, is wealth also. *Ibid.* 9 To an individual, anything is wealth, which, though useless in itself, enables him to claim from others a part of their stock of things useful or pleasant Take for instance, a mortgage of a thousand pounds on a landed estate This is wealth to the person to whom it brings in a revenue But it is not wealth to the country, if the engagement were annulled, the country would be neither poorer nor richer. *Ibid* 10 Wealth, then, may be defined, all useful or agreeable things which possess exchangeable value; or in other words, all useful or agreeable things except those which can be obtained, in the quantity desired, without labour or sacrifice. 1856 Froude *Hist Eng* (1858) I 1 87 An attempt was made to bring the production and distribution of wealth under the moral rule of right and wrong 1883 H. Sidgwick *Pol. Econ* I III 71 The wealth of any individual is considered to include all useful things—whether material things, as food, clothes, houses, &c, or immaterial things as debts, patents, copyrights, &c—which admit of being sold at a certain price This aggregate is suitably measured by its exchange value; the common standard of value, money, being taken for convenience' sake. 1891 Scrivener *Fields & Cities* xx 194 The Companies Acts have not, and will not, create wealth; it is not the function of law to create wealth,—only to regulate its distribution Wealth is created by labour. 1920 A W Kirkaldy *Wealth* 15 If this definition [Mill's] be accepted, the importance of abundance disappears Wealth may be a very small as well as a very big thing A single pin has exchange value, it is useful, and is therefore wealth ..So is a motor-car or a fine yacht or an Atlantic liner.

5 Plenty, abundance, profusion (*of* what is specified). Also, the condition of abounding *in* something valuable.

The word has the form of a pres. pple. or ppl. agent-noun (for the formation cf. ON. *vélandi* neut., gullet). The etymology has not been determined; for various conjectures see K. v. Bahder in Grimm s.v. *Waisen.* A parallel synonymous formation from the same root with different suffix appears in Weezle (= G. dial. *waasel*).

The forms *wosen* (14th c.), *wozen* (17th c.), and the mod. dial *oosen, hoosen*, are normal descendants of the OE. *wāsend*; and possibly the Sc. form *wassand* comes from *wāsend* with shortening of the vowel. The remaining ME. and mod. E. forms (including *weasand*) are anomalous: etymologists have generally attempted to account for them by the assumption of an OE. parallel form **wāsend*. This is not impossible, but Sweet (*Angl. Dict.*) appears to be in error in giving *wāsend* as an actually recorded variant of *wāsend*.]
